

Scaffolding for Habitat for Humanity

Sideview of the scaffold

Produce four scaffolds, they need to be square and uniform.

See scaffolds for habitat for humanity section in the photo gallery on the website, to see how the scaffolds are used. Also take a close look at the completed scaffolds.

- ▶ Take your time.
- ▶ Brace all 90° Angles.
- ▶ Measure everything twice.
- ▶ Make sure all of pieces are measured correctly before you start to weld.
- ▶ Tack everything together first and double check, all of your welds and measurements.
- ▶ Then make your solid welds.
